

Guatemalan Pride Day

This day, as the name indicates, is a day of pride for all of us, both foreigners and Guatemalans. This day is where we highlight everything that Guatemala symbolizes and represents to us and our ancestors. Among other things, we shared traditional costumes, famous foods, dances, and music. We have started hosting beautiful parades since the end of the pandemic that end at our school with a presentation of different dances. Now, this is part of a LIFE School family tradition.

Run For LIFE

Our miniature marathon was finally carried out. We are very happy for the participation of so many people who contributed to raise funds for our school. It was wonderful to see everyone running and reaching the finish line, tired but with joy on their faces. Our third RUN FOR LIFE awaits us next year.

SEL – Friendship Day Cards

We had a great day celebrating a month all about love and kindness towards our friends and teachers. On this day we all decided to make cards to show the appreciation we feel towards others. Our SEL committee showed great initiative when they introduced one of the traits of the month in such a creative activity.

Staff Spotlight

Mr. Jesús Recinos

8th. & 9th. Grade Math Teacher

Jesús is from Panajachel, Sololá, Guatemala. He is 22 years old and currently lives in Panajachel. He has a degree in agroforestry. He has taught topics of sustainable production and entrepreneurship on livestock and agricultural production to high school students for a 9 months the previous year. In addition, he has also worked on giving reinforcement classes in Basic Chemistry for students who want to enter university. Jesús likes to go for walks, watch sunsets, and play basketball. Currently, he works for LIFE School and is delighted with the excellent work and general environment that the school has. He likes to learn new things every day with each student he works with and he also likes to meet new people who come from other parts of the world.

I like to teach classes and especially the mathematics course because I know how difficult it can often be for a student to learn to work with numbers. I want to make mathematics known as something elementary and important but at the same time not difficult to work with. I always tell the kids I work with the following: "You are not clumsy, silly or slow, you are just learning something new and you are human." Likewise, I promote the importance of taking care of our environment and the relevance that environmental issues will take on in the future for our ecosystem in Panajachel.

-Mr. Recinos
